

DD460 Standby Power System

Rack-mount battery charger supply

- Modular 24Volt dc power system designed for roadside and other transport communication applications.
- Multi-bank internal batteries.
- DTP approval.
- Robust 24Volt 25Amp power supply modules with automatic current sharing.
- Automatic switch-over to generator supply on mains failure.
- Full monitoring and alarms.

Let our project team assist you with both the planning and management of the provision of dc standby power including installation and network distribution panels.
